

TALENT JOURNEY

What is Talentjourney about?

Talentjourney project aims to narrow the skills' gap in the manufacturing sector, in the field of Connectivity Devices and Services/CDS (IoT in smart manufacturing), which focuses on user-oriented, user-friendly and eco-friendly solutions.

Project partnership wants to bring VET stakeholder collaboration to excellence in content and ways of VET provision by innovating, acting agile and improving the responsiveness of VET providers to the needs of industry 4.0, new era society and young generations and become as such a worldwide known example for the excellence in IoT in smart manufacturing.

The name of our Platform for CDS VET excellence is Talentjourney, since our vision is to “Design a collaborating and engaging ecosystem where everyone can grow into a satisfied person and successful professional”. Everyone who is going to enter our Platform will be on a constant journey of discovering and developing their talents. The Platform will build on professional journeys of individuals to achieve excellence by providing top skills within IoT in smart manufacturing and using innovative pedagogical approaches.

Talentjourney Aims

- ⇒ to **narrow the skills' gap** in the manufacturing sector
- ⇒ to **innovate and improve the responsiveness of VET providers** to the needs of new era industry, new era society and young generation needs, as well as make it sustainable and agile
- ⇒ to **bring VET stakeholder collaboration to the excellence** in content and ways of VET provision

The only constant is change.

Main results

Main project outputs will be

- ⇒ data collection on skills needs in IOT in smart manufacturing;
- ⇒ trainings for professional development of trainers/teachers/company experts as tutors, leadership;
- ⇒ master class trainings
- ⇒ trans-national curricula and life-long trainings design;
- ⇒ establishing IOT demo labs;
- ⇒ testing and prototyping the services of Talentjourney;
- ⇒ digital platform for promoting and offering Talentjourney services.

Special milestones will be:

- ⇒ designing EU and regional stakeholder ecosystems;
- ⇒ sustainability of data collecting and professional

Main focus

Talentjourney represents a network of inter-connected regional and EU stakeholder ecosystems with emphasis on sharing, networking, working in teams and providing information.

The centre of Talentjourney is the learner supported by tutors and other stakeholders to help them discover and develop their talents. Talentjourney will provide the manufacturing sector with an international talent pool of future employees and IoT fluid experts to foster innovation and capacity building to master the future of the manufacturing sector.

Partners

Talentjourney involves VET institutions, companies, universities of applied sciences, national institutions. Toataly 13 partners from 5 member states of the European Union (Slovenia, Italy, Finland, Estonia and Germany).
